EDUCATION

M. Sc. Computer Science | 2023–2025

Bishop Heber College (Autonomous), Trichy, India

CGPA: 7.5 / 10.0

B. Sc. Computer Science | 2020–2023

National College Trichy (Autonomous), Trichy, India

CGPA: 8.5 / 10.0

PERSONAL SUMMARY

Reliable and results-driven professional with expertise in process optimization, project management, and data analysis. Skilled at managing workflows, improving efficiency, and maintaining strong organizational systems. Known for excellent communication, problem-solving, and leadership abilities that drive user success and deliver high-quality outcomes across business operations. Passionate about mobile development using Flutter.

EXPERIENCE

Internship – Suyap Tech Solutions

June 2024

- Independently developed a cross-platform mobile application using Flutter, focusing on both frontend implementation and backend integration.
- Built responsive UI screens from design concepts and integrated secure APIs developed in PHP.
- Used Postman to test and validate all API endpoints before integration.
- Ensured smooth data flow using Provider for state management.
- Strengthened skills in Flutter development, API consumption, and deploying scalable, high-quality mobile solutions in a real-world environment.

Internship – Siyag Rural Market Private Limited (Digistall)

May 26 – June 26 (Paid Internship)

- Developed and contributed to three key apps: Digital Rider, Gotan Store, and Digistall Store (in progress), handling complete Flutter development lifecycle.
 - Implemented mobile UI/UX from Figma, integrated APIs with Postman, and used Provider for real-time state handling.
 - Delivered key modules such as ride & parcel booking, store listings, inventory control, notifications, and live tracking.
 - Participated in full app deployment processes including Play Console upload, Firebase integration, and release signing.
 - Gained end-to-end exposure in building production-ready apps used by riders, customers, and store managers.
-

TECHNICAL SKILLS

Mobile Development

- **Framework:** Flutter
- **State Management:** flutter_bloc, Provider, setState
- **Key Packages:** socket_io_client, firebase_core, firebase_messaging, shared_preferences, shimmer, etc.

Backend Development

- Node.js Stack: Express.js, Socket.IO, JWT, Multer, bcrypt
- PHP Stack: Laravel

Databases

- MySQL
- MongoDB

Authentication & Security

- JWT-based login, Middleware for access control, bcrypt encryption, Role-based Access Control (RBAC)

Tools & Version Control

- Git (GitHub), Postman, Figma

CI/CD & Deployment

- GitHub-based version control, Azure App Service CI/CD
-

PROJECTS

Digital Rider – Rider Service & Order Management App

Flutter Project | Individual Contribution | Live on Play Store

A rider-focused Flutter mobile app enabling service bookings, order tracking, and delivery management for a localized 20 km launch zone.

- Developed rider-side features to manage ride, parcel, and store delivery services in real time.
- Integrated backend APIs using Postman and Flutter HTTP.
- Designed responsive UI using Figma; managed app state using Provider.
- Configured Firebase push notifications for real-time booking alerts.
- Uploaded signed AAB to Play Console, followed all deployment protocols.
-  App Live: [Click here](#) 

Gotan Store – Customer-Side Shopping & Delivery App

Flutter Project | Individual Contribution | Live on Play Store

A full-featured customer app supporting local store purchases, ride bookings, and parcel deliveries.

- Built OTP login, product catalog, cart/favorite, and order tracking modules.
- Integrated Google Maps & Places API for pickup/destination selection.
- Designed invoice summary UI with live delivery status updates.
- Synchronized orders with the Digital Rider app; state managed via Provider.
-  App Live: [Click here](#) 

Digistall Store – Store Owner App (In Progress)

Flutter Project | In Progress

A store-side app for managing products, orders, and deliveries via Gotan Store.

- Implemented shop creation and inventory upload features.
- Built admin verification flow and delivery handoff to riders or parcel services.
- Integrated push notifications for new orders and status changes.
-  Status: Under Development

Real-Time ChatApp – Cross-Platform Messaging

Flutter | flutter_bloc | Node.js | Socket.IO | Azure

A secure chat app with private messaging, media sharing, and real-time updates.

- Built UI with flutter_bloc, socket_io_client for live messaging.
- Node.js backend with JWT, file uploads (Multer), and bcrypt security.
- Deployed backend on Microsoft Azure.
-  Launching Soon on Play Store

OD Management System – College Department App

Flutter | PHP | Dio | JWT

A role-based OD management system for students, staff, and HODs.

- Built secure login, role-specific UI, offline access, and PDF OD generation.
- Adopted by 40+ users with strong feedback.
-  Successfully Tested and Deployed

Sociogram – Social Media App (In Progress)

Flutter | flutter_bloc | Node.js | MongoDB | Socket.IO

A scalable social platform with live feed updates, comments, and notifications.

- Frontend with bloc and advanced UI transitions.
- Backend with secure APIs, JWT, real-time content updates.
-  Status: In Development

ACHIEVEMENTS & AWARDS

- **First Place** – Quiz Competition (SRM Trichy National Level Coding College)
- **Received Shield** – Web Developer (Bishop Heber College)
- **Certified** – Completed OD App for the Department of Computer Science (Bishop Heber College)
